

ArmorCrypt

ArmorCrypt: ArmorCrypt is a three step process of converting information into a coded form to make it unreadable to unauthorized individuals, ensuring data security and privacy.

My algorithm: Encrypted plain text, using three secret step.

Benefit:

1. Highly secure.
2. Not possible to perform bruteforce attack.
3. We can change encryption level in it.
4. We can use it in any where.

Difficulty:

1. Not possible to break it ;)

Using:
